

GINGER SPICE HEALTH, LLC

## FOR MEDICARE AND MEDICARE ADVANTAGE PATIENTS

### **MEDICARE PART B:**

- Nutrition counseling is covered ONLY with a diagnosis of diabetes, pre-dialysis kidney disease (CKD), or 36 months post kidney transplant. Medicare does NOT cover pre-diabetes or any other diagnosis.
- SOURCE click here-> <https://www.medicare.gov/coverage/medical-nutrition-therapy-services>

### **Medicare Advantage plans (a.k.a. Medicare Part C):**

- Medicare Advantage Plans generally have the same coverage requirements and limits as Medicare part B, but there is possibility for additional coverage; you may call your insurance and find out.

### **Medicare Supplement plans (a.k.a. MediGap):**

- These plans don't provide any additional benefits beyond straight Medicare. If straight Medicare won't cover it, a Medicare Supplement won't either. These plans only help cover copays, which don't apply to nutrition counseling.
